

Sathiya Lingesh

📍 Hyderabad, Telangana ✉ sathiyalingeshveeramani@gmail.com ☎ 7598153895 in linkedin.com/in/sathiya-lingesh

Professional Summary

Android Developer with 2 years of experience with a strong foundation in implementing robust architectures (**MVI**, Clean Arch) using Kotlin, Jetpack Compose. Skilled in building Design Systems, Room Database, Firebase, Google Maps, Retrofit, OkHttp, Coil, Sentry, Mixpanel, OSC API, native-web JS bridge communication, with hands-on deployment experience to the Play Store.

Experience

Software Engineer

Track3D

July 2024 – Present

Hyderabad, Telangana

- Implemented a **Kotlin**-based chunked upload mechanism and multi-part form data, boosting file upload speed by **40%**.
- Implemented **MVI** Architecture to enforce **Unidirectional data flow**, resulting in a predictable state management system and helps in debugging easily.
- Created a modular **UI Component Library** hosted on **Maven**, providing standardized Buttons, TextFields, Alerts, Colors and Typography to ensure design consistency across application.
- Managed the entire development life cycle from development to deployment in **Play Store**, by optimizing app bundles and using R8 for Code shrinks.
- Integrated third-party **OSC API** (Insta360, Ricoh Theta), architecting a simple **BLE/Wi-Fi** connection flow for seamless device pairing, camera operations and media transfer.
- Designed a bi-directional communication flow between Native and web using a **JavaScript Bridge** to synchronize state and execute complex UI actions.
- Leveraged **ARCore** for precise indoor positioning, capturing global spatial coordinates to plot the real-time movement path on a **Floor Map** during **360-degree video** capture.
- Developed an **offline-first** caching strategy with **Room**, utilizing **TypeConverters** to serialize complex JSON structures and ensure robust persistence of capture metadata.

Software Engineer Intern

Track3D

Dec 2023 – June 2024

Hyderabad, Telangana

- Developed a application named **Granite** using **MVVM** architecture to capture phone images, record video with **ARCore** walking path data and upload using multi-part.

Projects

SpendWise

Sep 2023 - Nov 2023

- Built Android application which keeps track of the user's incomes and expenses, classifies them, and generates statistical analysis and chart visualizations for easy interpretation.
- Tools Used:** Kotlin, Firebase

Resource Flow

Mar 2023 - May 2023

- A web-based application that retrieves numerous electricity bills linked to a person and lets them pay all their bills in one-go using razorPay.
- Tools Used:** MongoDB, ExpressJS, ReactJS, NodeJS

Technical Skills

Programming Languages: Java , Kotlin, SQLite, JavaScript

Technologies/Libraries: Jetpack Compose, Android SDK, Retrofit, Dagger, Hilt, MVI, MVVM, Coroutines, Google Maps, Firebase, SQLite, Room, Git.

Tools: VS Code, Android Studio, Git, GitHub, Azure DevOps

Education

PSG College of Technology

Master of Computer Applications

Sept 2022 – May 2024

CGPA: 8.3/10.0

PSG College of Arts and Science

Bachelor of Computer Applications

June 2019 – June 2022

CGPA: 8.5/10.0
